

CentaFlex™ Decellularized Human Placental Matrix

Product Highlight

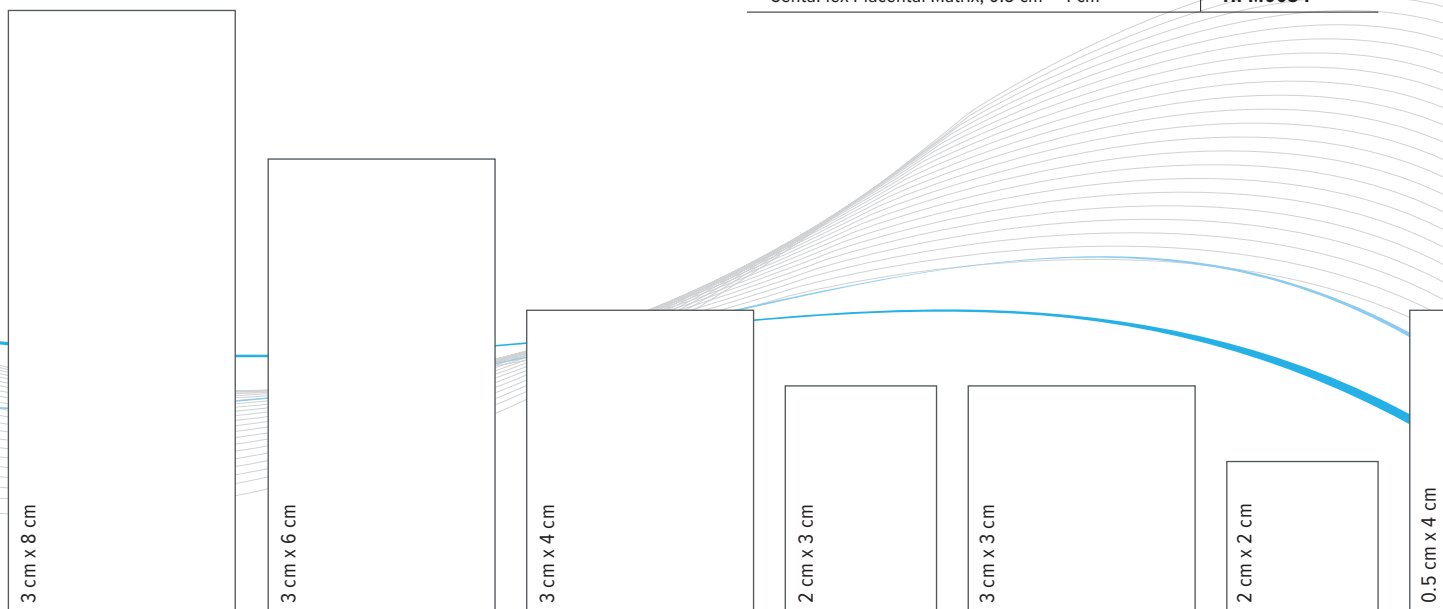

CentaFlex decellularized placental matrix is derived from human umbilical cord and provides strong, durable support for soft-tissue repairs. CentaFlex placental matrix can be used as a surgical covering, wrap, or barrier to protect and support the repair of damaged tissue.

Features and Benefits:

- Robust and strong to hold a suture; 800 microns thick
- Flexible for use across a wide variety of applications
- Biologic membrane supports the body's healing process
- Terminally sterile with 10-year shelf life
- Ambient room-temperature storage
