

# Synergy<sup>RF</sup>™ Bipolar Ablation System with ApolloRF™ MP90 Probe

Minimally invasive system that effectively ablates and coagulates tissue in arthroscopic procedures

Synergy<sup>RF</sup> Console

ApolloRF MP90 Probe

## ApolloRF Probe Features (AR-9811):

- Utilizes controlled plasma based Bipolar<sup>RF</sup> technology
- 90 degree tip configured to access and ablate tissue rapidly
- Durable one-piece active electrode
- Easy to use, ergonomic hand controls
- Multiple ports for efficient bubble removal

## Synergy<sup>RF</sup> Console (AR-9800): includes power cord

- Integrates with Synergy Imaging System or operates as a stand-alone unit
- Probe recognition function identifies probe currently in use
- Metal proximity detection function suspends power when in close proximity to scope and metal instruments
- User friendly LCD touch interface screen
- Easy to adjust ablation and coagulation settings

## Synergy<sup>RF</sup> Footswitch (AR-9800-F): ordered separately

- Separate ablation and COAG pedals
- Central ablation level adjustment button
- Integrated carrying handle
